[As a practicing Emergency Room physician I have personally experienced the abuse of the malpractice legal system purely for financial gain. Still, I couldn't be more opposed to SB368 which extends peer review confidentiality and protection from hospitals to virtually all physician groups. I have seen hospitals abuse this protection to attack well qualified doctors and shield bad ones without fear of accountability for their actions no matter how egregious, unfair and otherwise illegal they might be.

Any action, however wrong, can be hidden by simply calling it "peer review".

Extending this blanket protection to all groups makes a very bad situation much worse. Please vote against SB368.]
